Fall Fitness Activities

Exercising during pregnancy and postpartum can be a great way to reduce some pregnancy symptoms like back pain, constipation and bloating. It can also increase mood and energy during labor and postpartum months. Exercise doesn't always have to be done in the gym or cost much money, here are some ways to get moving during the fall and fun ways to get young children involved as well.

- **Picking Pumpkins** Visiting a pumpkin patch is a great way to increase activity and is a fun way to get younger kids involved and outside.

- **Picking/Raking Leaves** A fun way you and your little ones can spend active time outside, and can be turned into an art project by tracing leaves or making collages.

- **Scavenger Hunts** A fall-themed scavenger hunt is another fun way to spend some time outside. Use the items your child finds for a fun educational project: What kind of tree did this leaf come from? What kind of animal eats acorns? Which items did you find that are red?
