Moving forward with COVID-19

What are we doing to keep you and your family safe?

Submission of Plans to a Safety Committee:
* In an effort to keep you and your family, our staff, and local Guilford County community safe, we are abiding by the UNCG regulations to submit a COVID-19 safety protocol proposal to the UNCG Ramp Up Task Force.
We will only resume normal operations with enhanced safety protocols once we have been approved by this task force.

Recruitment:
We have not resumed Recruitment or Prenatal Visits.
If you know anyone who is pregnant and may be interested in participating, please feel free to pass along our contact information.

There will be Changes:
Planned visits will be occurring, even if late.

2 Month:
The following changes are temporary as the pandemic continues:
* 2M Visits will take place on campus
* If we miss your 2M visit, we will still attempt to collect urine

1 Year:
The 1 Year visit will be pushed back to a 14 month visit in an attempt to keep all visits on the same accord.

What are the enhanced measures we will be taking?

Face Masks:
Our staff will wear a fresh surgical mask for each family that comes in. We will provide a mask for moms, if needed.

Face Shields:
Our staff will wear a face shield that are sanitized according to CDC standards before each visit.

Lab Coats:
Our staff will wear a disposable lab coat for each visit.

Gloves:
Our staff will wear disposable gloves for each visit. Gloves will be changed throughout the visit multiple times.

Hand washing:
Our staff will follow CDC recommendations on handwashing, washing for at least 20 seconds. We will also instruct you to wash your hands periodically throughout the visit.

Hand sanitizing:
Our staff will sanitize hands after removal of gloves and at several points during visits. We will instruct you to wash your hands with sanitizer periodically throughout the visit.

Equipment Covers:
All our equipment has been covered in vinyl or covers designated for the particular item. This allows for extra cleaning of anything you or your baby may touch.

Health Screeners:
Our staff have signed health screeners when returning to work and are self-monitoring symptoms and exposures. We will have you fill out and sign a similar form regarding symptoms after taking your temperature with a no-contact thermometer.

Surface Deep Cleaning:
Our staff will be deep cleaning each item located in our rooms before each visit. This includes washing, laundering, and wiping down items with CDC recommended disinfectants following their guidelines.

On Campus Visits:
In order to control the environment, all visits will be taking place on campus. This will allow us to maintain peak safety.

These are only a few of the extra precautions we are taking! There are more!
Some Fun Activities for you and your little one!

What you Need:
- Terra Cotta Pot or Plain Flower Pot
- Foam Brush
- Large Paintbrush or Foam Brush
- Craft Paints

Steps:
1. Paint the flower pot in a base color, if desired. Let dry.
2. Use your and your little ones fingers to paint petals and insects like bees, caterpillars, and butterflies.
3. Draw stems, dotted lines, and decorate as desired.
4. Plant in them as another activity!

Project Update!!!
Thank you to all of you who have completed your surveys online while we waited for permission to start visits back up on campus.

We look forward to seeing you again soon!!!
